

## JOHN ROBERT GAUFO

---

Sorsogon, Philippines | +63 919 449 8333 | johnrobertgaufo1@gmail.com | github.com/jbline-dev | Jbline.vercel.app

### PROFESSIONAL SUMMARY

---

Information Systems graduate with hands-on experience developing full-stack web applications using PHP, JavaScript, HTML, CSS, and MySQL. Experienced in requirements gathering, application development, database-driven systems, testing, deployment, and configuring development environments using XAMPP, Apache, and MySQL. Also experienced in LAN infrastructure, network troubleshooting, structured cabling, and server configuration through IT internship and academic projects.

### EDUCATION

---

**Sorsogon State University**

Sorsogon, Philippines

Bachelor of Science in Information Systems

June 2026

### EXPERIENCE

---

**Sorsogon Provincial Disaster Risk Reduction Management Office**

**IT Intern** | January 2026 – April 2026

Sorsogon City, Philippines

- Developed four full-stack web applications for organizational use, including a 911 emergency system, ICT inventory system, NAS-based file system, and directory system.
- Configured and managed XAMPP, Apache, and MySQL environments to support application development, testing, and deployment.
- Assembled and organized data cabinets and server racks, including cable management, grounding, and patch panel installation.
- Installed and tested structured cabling systems and supported LAN infrastructure across designated work areas.

### PROJECTS

---

**Knowledge-Based DIY Troubleshooting Guide & Appointment System**

**Project Leader / Full-Stack Developer** | June 2024 – December 2025

Sorsogon, Philippines

- Gathered and translated stakeholder requirements into technical specifications and functional software features.
- Led a four-member development team in building a full-stack troubleshooting and appointment management system.
- Configured and managed local development environments using XAMPP, Apache, and MySQL to support application development, testing, and deployment.
- Coordinated development tasks and team activities to deliver core system features on schedule.
